

Dr. Manisha Grover

CLARENDON DENTAL ARTS

To help patients achieve optimum overall health as well as dental health, we study each patient's oral biome for a comprehensive picture that includes nutrition, health challenges, breathing patterns and alignment—everything that can impact oral and systemic health. We also offer cosmetic dental treatments, including porcelain veneers, whitening, Invisalign and implants.

Q: How have you mentored or inspired others who are following in your footsteps?

A: As a women-owned business, we are surrounded by like-minded women who can create mentorship opportunities for others beginning their careers, a critical step in building strong, confident female leaders. We encourage our team's personal and professional development, helping them become better dental care providers and the best people they can be. Our values foster self-worth through education, relationship-building, individualized patient care and community outreach.

Q: What advice would you offer for women just starting out?

A: Believe in your dreams and pursue them with passion!

Q: What are your top priorities?

A: It is important to me to keep myself

and my team educated in the latest technology, education and treatments. Rather than treating patients reactively, addressing issues only as they arise, we stay at the forefront of the latest tools and techniques, using today's scientific advances to provide conservative and proactive treatment options.

Q: What do you look forward to when you go to work every day?

A: Helping my patients become healthier, more confident individuals by creating beautiful smiles built on a holistic, solid foundation that will last a lifetime.

Q: What do you love most about doing business in this area?

A: I love our urban location within a vibrant community that is highly educated.

Patients appreciate the ease of access our location provides.
